ABOUT THE CREATOR

I'm a Senior Software Engineer and passionate tech enthusiast. Outside of my professional role, I create content on technology, coding, running, hiking, and more. Over the past four years, I've shared my insights across various platforms, which has led to significant recognition, including being honored as one of the top 100 inspiring Muslims in the UK.

Hear feedback from brands I have worked with:

"I reached out to Hamad after coming across some of his content on Instagram and found his desk setup really aesthetic and pleasing. As a business that sells wall art decor, it only made sense to connect with Hamad and see if we could help in anyway towards his setup. Hamad was incredibly welcome to the idea of a collaboration and his communication with us has made the process soo much smoother. " - **Still Canvas**

"Collaborating with Hamad has been a great experience! His attitude and willingness to work have always been the best. He frequently demonstrates that elegance, comfortability, and innovation can be all in one while using our speakers in his incredible and clean setup." - **Edifier**
